Programi izobraževanja odraslih sledijo potrebam gospodarstva in trendom sprememb v družbi ter omogočajo pogoje za boljše življenje in delo odraslih. **Za učenje in pridobivanje novih znanj je vedno pravi čas.**

Slovenski vzgojno-izobraževalni sistem zagotavlja enakopravno vključenost oseb s posebnimi potrebami.

Z **razvojem znanstveno-raziskovalne dejavnosti** doma in v tujini, krepimo globalni raziskovani prostor.

MISSION

Together with our stakeholders we create an inclusive, equitable, sustainable and creative society of lifelong learning, strengthen the participation of young people and encourage sporting activities.

We are committed to the **equal participation of all stakeholders in an accessible, flexible and future-oriented education system**. We seek new teaching and learning strategies, enabling individuals to mature into responsible and independent members of the community.

Pre-school and elementary education constitutes **the foundation of a learning society**.

In secondary education we implement approaches that **integrate the education system with the economy**.

Higher-education study programmes derive from **the human resource needs of the private sector** and enable students to acquire vocational competences.

Aiming at **innovation and excellence in higher education**, we create the conditions for a competitive and internationally-recognised higher education system.

Adult education programmes follow the needs of the economy and the trends of changes in society, providing better living and working conditions for adults. **There is always a good time for learning and gaining new knowledge.**

The Slovenian education system ensures the equal inclusion of people with special needs.

By **developing science and research** at home and abroad we are strengthening the global research area.

The programmes for sports in the public interest are in line with the principle of **“a sound mind in a sound body”**.

We promote and take care of the development of the youth sector and youth work, strengthening the participation of young people in the management of public affairs and the creation of youth policies.
